

# DEPICTIVE RENOVATION PROJECTS

MJ Neal Associates is a general practice architectural firm specializing in meeting the needs of clients, friends, and communities. Having been in existence for over twenty years, our list of project types, clients and services continues to grow, while sustaining excellent client relationships and upholding our design standards. The success of a project begins with a few key principles, and our broad experience base can provide the foundation to apply those principles to your project.

North Central Regional Library, Wenatchee WA- This historic Art Moderne Structure was previously a bottling plant and was remodeled with careful attention to its historical detailing.

Eastmont Jr. High Redevelopment- East Wenatchee, WA- The 2-story main building on the Eastmont High School Campus was built in 1947. The campus continued to grow and eventually became the Junior High School. After a new Junior High was built, the property was sold and is now being upgraded and remodeled. The gymnasium has been converted into Gold's Gym and the classroom building is being remodeled into modern offices spaces.

Liberty Theatre Annex, Wenatchee, WA- Conversion of a 1910 vintage structure adjacent to the Liberty Twin Theatre adding three new cinemas.

EZ's Burger Deluxe Drive-In, Wenatchee, WA- A design award winner, EZ's resembles a 1950's diner, but was actually an extensive renovation of a gas station office. Exterior treatments include colored plaster, glass block, and its most distinctive feature, roof mounted signage. Departing from normal 2-D signage, EZ's 3-D rooftop signage of supersized burger, fries and a Coke becomes part of the building itself.
